SUMMARY

Web developer with 3.5+ years of professional experience (since March 2023) building custom WordPress themes, Shopify stores and React applications. I plan, design, build and maintain a full-stack React + Supabase platform on my own, including its move from single-tenant to multi-tenant. Currently a Web Developer at Ghost Digital and Data, working on client WordPress, React and Shopify sites.

EXPERIENCE

Web Developer · Ghost Digital and Data

Aug 2025 – Present

WordPress · ACF · Elementor · React · Shopify · ASP.NET Core

- Built the agency's own WordPress website.
- Redesigned Sterlington Law on a custom WordPress theme with ACF; maintain and optimise it: image optimisation for an image-heavy site, SEO, Google Search Console and performance (LCP).
- Designed and built EE Glazing in WordPress and Elementor; developed GDDLTD in React.
- Recreated InCloud Data's site in ASP.NET Core after it went down, from screenshots and images of the old pages, in 2–3 days.
- Shopify work for HiFi Consultants, including catalogue and pricing updates from product exports and supplier price lists.
- Contribute to the company's in-house software products.

Full-Stack Developer (Freelance) · Zarrar Cooling Services

Jul 2025 – Present

React · Supabase · PostgreSQL row-level security

- Planned, designed and built the whole platform alone: a public website plus admin, technician and branch panels.
- Converted version 1 from single-tenant to multi-tenant: a tenant ID on every table, Supabase row-level security policies, and a per-table migration rehearsed on a test copy of the real data before going live.
- Ongoing maintenance and bug fixes.

Shopify Developer (Contract) · Aerosoft Studio

Jun 2025 – Aug 2025

- Customised a theme-based Shopify store and uploaded the product catalogue.
- Set up the order-fulfilment workflow: label generation, picking, packing, shipping, returns, damaged orders and payment gateways.

React Developer (Freelance) · Toiyabe

Mar 2024 – Apr 2024

- Redesigned existing pages, built new ones and fixed UI/UX issues in the admin panel of an existing React site.

Front-End & WordPress Developer · Axie Consulting

Mar 2023 – Apr 2025

Joined as Junior Front-End Developer · WordPress · WooCommerce · React

- Developed the company's own website.
- Rebuilt CoDev's existing website as a custom WordPress theme.
- Delivered WooCommerce and custom-theme WordPress sites for business clients.
- Built pages and components for React sites for the Senate of Pakistan and SCO, as part of a team.

Earlier

- Warehouse In-charge (6-month contract), Fatima Fertilizers Group, 2022 – 2023: stock, staff, dealers and ledgers.
- Freelancer on Fiverr and Upwork, 2020 – 2022: graphic design, video editing and SEO; self-taught WordPress, HTML, CSS and JavaScript from 2021.

SKILLS

FRONT-END	HTML, CSS, JavaScript, React
WORDPRESS	Custom themes, ACF, Elementor, WooCommerce, headless WordPress with React (local demo)
SHOPIFY	Theme customisation, product setup, order fulfilment, payment gateways, catalogue and pricing updates
